PROFESSIONAL SUMMARY

Computer Science student with strong programming fundamentals and hands-on experience building AI-powered applications, RAG systems, voice assistants, and full-stack web applications using Python, Java, C++, JavaScript, SQL, Flask, LangChain, LLMs, and vector databases.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL

Frontend: HTML, CSS, JavaScript

Backend: Python, Flask, REST APIs

Databases: MySQL, PostgreSQL, SQLite

AI / ML: Generative AI, RAG, LLMs, LangChain, Embeddings, Vector Databases (Chroma, FAISS)

Developer Tools: Git, GitHub, VS Code, Postman

EXPERIENCE

InAmigos AI – AI Intern

- Explored and evaluated AI tools including ChatGPT, Google NotebookLM, Claude, Gamma AI and Google Nano Banana.
- Researched and documented features, use cases and practical applications of AI tools.
- Created structured documentation and learning materials on AI technologies and their applications.
- Worked with AI-driven workflows, automation and productivity tools.

PROJECTS

FlexiParse – RAG-Based PDF Question Answering System

- Built a Retrieval-Augmented Generation application for uploading PDFs and asking questions about their content.
- Implemented PDF text extraction, document chunking, embeddings and vector search using Chroma/FAISS.
- Integrated LangChain with an LLM API to generate context-aware responses from retrieved document data.
- Designed a web interface using HTML, CSS and JavaScript with a Flask backend.

Phantom – Personal Voice AI Assistant

- Developed a voice-based AI assistant capable of receiving spoken commands and responding through synthesized speech.
- Integrated speech recognition, text-to-speech and LLM capabilities to create a conversational assistant.
- Implemented wake-word activation and connected voice commands to practical desktop tasks such as application control, web search and information retrieval.
- Designed an extensible command system for additional voice commands and AI-powered capabilities.

EDUCATION

Bachelor of Science in Computer Science

Mumbai University, Mumbai, Maharashtra, India

CERTIFICATIONS

- Jio AI Foundation Course
- InAmigos AI Internship

ACHIEVEMENTS & ADDITIONAL

- Active on GitHub with personal and technical projects: github.com/CodeWith-Mukesh
- Built projects involving AI, RAG, web development, backend systems and voice-based automation.
